PROJECTS

Member portal

09/2025 - 11/2026

Maiara technologies

Worked on developing and maintaining a **Member Portal**, a web-based application that allows registered users to securely access and manage their personal information, services, and account details. **Member Portal** is a website that enables customers to view their **earning rewards, track reward points, and check their transaction history** in a centralized platform. Contributed to building user-friendly interfaces, implementing backend functionalities, and integrating APIs to ensure smooth data flow. Assisted in

debugging, improving performance, and enhancing the overall user experience using **Java and web technologies**.

Loyalty Management system(LMS))

12/2025 - 06/2026

Maiara technologies

Currently working on an existing **Loyalty Management System (LMS)** project, contributing to enhancing the application and adding new modules. **Independently developed the Budget and Leaderboard modules on the frontend**, focusing on building responsive UI components, implementing user interactions, and integrating APIs with backend services to ensure smooth functionality and a better user experience.

MiniProject Icpproblem2022

Developed a **mini project based on ICPC 2022 programming problems**, focusing on solving algorithmic and logical challenges using programming concepts. Implemented efficient solutions by applying problem-solving techniques, and optimization methods to handle complex computational tasks.
